| 03 Apple Certified Technical Coordinator | 06 Apple Mobility Technical Competency (MTC) | 09 MobileIron Certified Professional Services |

BeMobile iOS and MobileIron Jump Start

The iPad® has changed the way businesses connect, communicate, and collaborate. PCM can help simplify the deployment and management of the iPad for beta test environments, Proof of Concept (POC), and production deployments.

For organizations that are considering beta testing or Proof of Concept (POC) deployments, our BeMobile Jump Start Kit is the perfect place to start. It comes with all the components needed to successfully and securely launch a mobility solution:

iPad Air 2 (25 units) 16GB Wi-Fi	+	MobileIron MDM (12-Month license) Platinum Bundle	+	AppConnect	+	On-site Deployment Services Integration and Consulting Services	Total Cost \$24,575

MobileIron® Connected Cloud®

MobileIron® Connected Cloud® is a cloud-based Mobile IT service that secures and manages mobile apps, docs, and devices. It is the SaaS version of the market leading MobileIron on-premise solution. The Connected Cloud service is a comprehensive mobile solution that also provides deep integration with enterprise IT infrastructure. The service scales to thousands of users and devices, offers superior availability, and is certified against the most rigorous standards for data and operations security.

MobileIron AppConnect and the enterprise

MobileIron AppConnect containerizes apps to protect corporate data -at-rest without touching personal data. Once applications are wrapped with the MobileIron AppConnect wrapper they become integrated into the secure container on the device. Each app becomes a secure container whose data is encrypted, protected from unauthorized access, and removable. AppConnect works with some of the most advanced and recognized app in the enterprise such as Divide PIM, iAnnotate, Box, and Acronis.
