When you choose PCM Hosted Exchange Services, you can now take your office with you whether you're working on-site, in the field, or teleworking. Your workers gain access to e-mail, calendars, and contacts from their computers, the web, and their mobile devices — all synchronized to keep everyone on the same page. Sharing documents and collaborating with colleagues online is easier than ever before.

It's the power of the cloud delivering a new kind of productivity and efficiency — all without the burden of costly infrastructure.

Fewer Burdens for Your Office

Every organization and enterprise needs high-end communication tools that allow their workers to

keep connected and stay productive no matter where they're located or how they're connecting. Every organization and enterprise needs them, but they can be challenging to deploy and maintain. By turning to a Software-as-a-Service (SaaS) model, organizations no longer have to provide the physical space, servers, power, cooling networking infrastructure, or IT is required to manage it all.

The cost savings can be significant, and the experience of a cloud-based service makes it transparent to your end users. With our Hosted Exchange Services, you can free up your workforce and your budget while deploying any or all of the following components that modern offices rely on for versatile and effective communications.

Hosted Exchange

Anywhere Access | Continuous Collaboration | Professionally Delivered

We maintain SSAE 16 accredited data centers to meet the highest standards of internal control. From server virtualization to high availability SAN storage, we support all of your advanced business technology needs.

- **Microsoft Exchange/Outlook e-mail:** comprehensive corporate class e-mail and time management tools make it easy to prioritize and control your workday

a scalable hosting infrastructure that takes advantage of the latest technologies to provide the highest levels of service delivery and operational continuity.

- Take advantage of any or all components
- Eliminate the up-front capital costs associated with new solutions
- Leverage low monthly per-user fees to access the latest applications as your business grows
- Implement a solution that grows and scales with your business without forcing you to hire additional IT staff
- Subscription-based hosting services provide access to the latest communications tools as your business needs change

Stay connected with Hosted Exchange Services

- **Microsoft SharePoint:** enables better informed decisions by providing business critical information in one location
- **Microsoft Lync:** an enterprise-ready unified communications platform that integrates with Microsoft Office to allow audio, video, or web conferencing; instant messaging; and real-time presence information
- **Microsoft CRM:** customer relationship management with online tracking and sharing of customers and opportunities
- **ActiveSync/BES:** keeps e-mail, calendars, tasks, and contacts updated on supported mobile devices, including Blackberry devices.

Better Hosting

We take pride in creating the most versatile and secure data centers for hosting your critical assets and services, so you can save on costs. From knocking down spam to backing up your databases, we offer essential communication services that can be customized to your specific business needs.

Our dependable hosting centers are fully authorized and approved by Microsoft. We employ

We maintain SSAE 16 accredited data center facilities to meet the highest standards of internal control. From server virtualization to high-availability SAN storage, we can support all of your advanced business technology needs. Unlike other cloud-hosting providers who are held back by restrictions or limitations on what they are able to provide, we can harness the full complement of service solutions to meet your needs.

Dedicated Environments

We can provide a dedicated, customized environment for your hosting. That means you will have your own designated servers, software licensing, and other technologies that are separated from any of the hosting setups that we have for other clients. The end result is a customized data center devoted only to your business that offers all of the benefits of off-site hosting.

Affordable and Flexible

With dependable hosting services, your business can avoid the heavy hardware, software, and support expenses required for on-premise deployments.

Safe, Secure, and Compliant

As e-mail threats have grown, the need for e-mail security and encryption has become more complex. With our Hosted Exchange, your e-mail is protected against malware, spam, and data leaks without compromising performance. And, our cloud-based platform stores all your e-mail in a highly secure archive to help address regulatory and compliance needs while reducing complexity and mitigating risk.

Our team of experts can take care of everything so that you can focus on your business. We'll assess your current environment, develop a deployment plan to fit your exacting specifications, assist with a smooth migration experience and maintain the hardware — as well as patch and upgrade the system — once you're operational. Call your Account Executive today to start leveraging Microsoft's productivity tools for versatile, scalable, and affordable communications.
