

GET THE SHORT-TERM AND LONG-TERM  
**IT HELP YOU NEED TO GROW YOUR BUSINESS**

We have the IT staffing experts ready to assist you.

### Smart Staffing Services

If you're facing rapid growth or have IT roles that cannot wait to be filled, then give us a call. Our staffing services help build the qualified technical workforce that modern businesses need. We'll help you define the roles and then quickly fill them with short-term and long-term placements.

### PCM has a variety of staffing specialties to keep your business running smoothly

Specialties Include: Decentralized or campus environments, high-turnover positions, and coverage for dynamic business environments experiencing spikes in IT activity. We deliver qualified IT professionals to companies looking to successfully deploy short-term and long-term personnel. Contact your Business Support Specialist today to start your search.

We can help you with the unpredictable demands a growing company can put on an IT department. In many cases, it may not be within your strategic interest to hire full-time employees for short-term projects. We can provide staff for projects managed by your team, such as IMAC, service desk, and desktop support. We can also bring on specialized personnel during intensive implementations, encompassing storage, messaging, security, servers, mobility, backup, virtualization, and network infrastructure.

We provide the flexibility and varied skill sets you need to complete your projects while helping you maintain budgetary control over variable costs and human resources. We work with you to define the necessary skill sets and then deliver the right resources to fill all of your business requirements.
