PCM Partnership Benefits

Customized corporate sites

Our customized Business Direct Sites provide a range of free services that save you time and money by streamlining your acquisitions, managing your software licenses, reporting on purchases, and more.

Employee Purchase Programs

Share your corporate discount with your employees at no cost to your company through an Employee Purchase Program (EPP). An EPP site gives your employees access to our inventory at great low prices.

Dedicated Account Executives

Our knowledgeable Account Executives partner with you to understand your business and develop smart solutions to solve your challenging technology needs.

Integrated solutions

Our experienced, certified specialists can help plan, deploy, and maintain core technology solutions, including data center optimization, virtualization, Microsoft solutions, networking, digital signage, security, and much more.

Lifecycle services

From staging new equipment to disposing of old systems and everything in between, we are with you every step of the way, providing essential services across the entire IT lifecycle.

Leasing and financing

Leasing IT services is a sound, fiscally responsible alternative to buying, and PCM Finance can help you maintain your competitive edge and cash flow with multiple leasing options.

Enterprise relationships

Because of long-standing relationships with enterprise-level vendors — Microsoft, Cisco, IBM, VMware, and many more — we are proud to offer over 300,000 products covering every aspect of IT for all marketplaces.

No credit card surcharges

We accept MasterCard, Visa, Discover, American Express, and Diners Club.

PCM Locations

PCM provides national coverage with local attention

PCM offers exceptional procurement and logistics for a broad array of IT products; consulting and implementation services delivered through over 1200 Technical Professionals; and a rich array of managed and operational services to allow your organization to lower operating costs, increase business agility, improve your overall efficiency, and succeed in today's global economy and beyond.

Since 1987, PCM has been a leading provider of IT products, services, and solutions to businesses, government agencies, education institutions, and healthcare facilities. We provide access to over 300,000 IT products and the largest portfolio of technology services, including assessments, deployments, and management. Whatever your IT goals are, we have the experience and skill to make them a reality.

No matter where your business happens to be located — from the Northeast to the Southwest — PCM provides exceptional IT services across the entire United States. Along with our main campuses in California, Illinois, Ohio, and Virginia, we have satellite offices situated in key states throughout the U.S. That way, we're able to deliver national reach while treating every client like our neighbor next door.

**So small. So compact.
So full of high-speed power.**

Full EliteDesk Functionality

Keep productivity high and downtime low with HP BIOSphere firmware-level automation. Your PCs have extra protection thanks to automatic updates and security checks. Enjoy customization that allows your PC to evolve with your business

Big power and space saving design.

Be up to 35% more productive by adding up to three independent displays using the integrated DisplayPort with Multi-Stream video outputs. It's smaller than desk

phones, this Desktop Mini can fit almost anywhere vertically or horizontally. The integrated wireless antenna allows flexible deployment to optimize the workspace.

**XL Performance
in an XS Package**

Introducing the new HP EliteDesk 800 Mini.
HP's Smallest desktop yet.

HP EliteDesk 800 Mini

Like your deadlines, your space is tight. So we shrank the desktop PC down to 2" by 7". The new HP EliteDesk 800 Mini thrives in even the smallest work spaces. In fact, it stylishly mounts on a wall, under a work surface, or on a display, so it doesn't take up needed real estate. It's a desktop designed to fit almost anywhere, with performance big enough to handle your most important tasks.

Contact your PCM Account Executive today to learn more about the HP EliteDesk 800 Mini or call **1-800-700-1000**.

Engineered for performance

Get full power of graphics when you need them and longer battery life when using lighter graphic applications.

HP ZBook 14 Mobile Workstation

Everything you'd expect of the world's first workstation Ultrabook. HP's lightest mobile workstation — the new HPZBook 14 utilizes impressive professional 3D graphics. It's automatic and seamless with hybrid graphics. This superbly thin, customizable workstation is light enough to carry when you're on the go — and powerful and reliable enough to carry you through the workday.

HP ink is ready for the enterprise

Introducing

The new HP Officejet Enterprise Color Flow X585z Multi-Function Printer

Make no compromise. Powered by HP PageWide technology, the HP Officejet Enterprise Color MFP X585 series offers the features and reliability you expect - at up to twice the speed and half the cost per page of color lasers.

Tackle color printing and high-volume jobs, page after page. With the same security solutions seamless integration and simple management as HP LaserJet MFPs, this device is ready for the enterprise.

Cut costs in half

Reduces energy use because it's built without a fuser to consume less energy than many color lasers in its class.

Laser-like duty cycle

Equipped to handle big jobs with large supply capacity, large-capacity paper trays, and auto duplex.

Revolutionary speeds

HP PageWide Technology processes pages in a single pass for speeds up to 70 pages per minute at half the cost of laser.

Contact your PCM Account Executive today to learn more about the HP OfficeJet Enterprise Color X585z Multi-Function printer or call **1-800-700-1000**.

Print with manageability, productivity, and mobility

HP LaserJet Pro 400 M451nw color printer

Now you can produce professional-quality color documents with ease and fast speed. Seamlessly integrate into your office or wireless home network. HP features help you save paper and energy, and print from virtually anywhere with HP ePrint.

Produce bold text and smooth color with HP ImageREt 3600 and Original HP LaserJet toner cartridges. You can print documents affordably. Get the same black cost per page as a black-and-white HP LaserJet printer and Reduce energy use with HP Auto-Off Technology. Also save with Instant-on Technology.

- Up to 21ppm color and B&W print speeds*
- 600 x 600dpi maximum resolution
- 40,000-page monthly duty cycle
- 2-line LCD display
- HP ImageREt 3600 resolution technology
- 802.11b/g/n Wi-Fi, Ethernet, and USB 2.0

Set a new pace for your print load

HP Officejet Pro 8620 e-All-in-One printer

Print eye-catching color marketing materials for up to 50% lower cost per page than lasers. Cruise through high-volume printing tasks and help keep business moving with easy mobile printing!

Professional color for less than lasers

Count on a better value for frequent printing with Original HP high-capacity individual ink cartridges. Every page will look professional, using Original HP pigment inks for vibrant, durable prints. Also creates borderless, double-sided materials for all your business needs.

Print where you want, when you want

Allows you to print via any NFC enabled smart phone, tablet or laptop. Don't worry about your wireless print security because the Officejet Pro 8620 gives you the option to print wirelessly without any network or router access required. Plus you can easily print documents by sending an email to your printer using innovative new HP ePrint technology.

Stay Connected Anytime, Anywhere

Wireless networks are highly visible in businesses today. They provide mobile workers with the flexibility to move their workspace with ease, giving them the capability to shift from cubicle to conference room to collaborate with others, or

to the outdoors for some needed fresh air. Wherever it may be that they choose to work, they undoubtedly expect to stay connected.

When wireless networks were originally deployed in the work place, they were seen as a convenience. Nowadays, wireless networks are a necessity as the number of devices grows 3x. With laptops, tablets, and smartphones in addition to the growing trend with BYOD adding non-standard devices and operating systems to the IT environment, wireless connectivity has grown in demand and complexity. More and more workers use wireless as their primary access and any disruption or challenge accessing the network can have serious impact on productivity.

Wireless networks are not for everyone or everywhere. There is still a need for wires in the data center to support connectivity of core systems and 10Gb Ethernet continues to provide the best network infrastructure for the data center for the foreseeable future. Businesses in media and graphic design still need wired connections to support multi-gigabyte file transfers and those in banking or medical still need to overcome resistance with the perception that wireless introduces security risks.

The future is wireless access for the majority of businesses and there are plenty of options in the market that wireless vendors are promoting; distributed vs. centralized, controller vs.

controller-less and cloud hosted vs. cloud managed. It can be difficult to be up-to-date with all the upcoming trends and challenging to make the right decision, knowing the uncertainty of technology as it matures.

How PCM can help

PCM is changing the game for how wireless services are delivered to the Enterprise. The PCM Networking Wireless Service offering is a Cloud based managed Enterprise-class Wi-Fi solution that enables businesses to easily deploy an enterprise-wide Wi-Fi network without the complexity and costs of traditional networks.

We offer customers financial flexibility, eliminating up-front capital costs while providing an easy deployment model for delivering wireless services to the business.

Our Network Wireless Service offering includes a site survey, consulting and implementation services to properly determine the coverage requirements for each customer location. PCM will then ship the required APs to each customer location.

PCM Services will either install the equipment or provide physical installation instructions depending on the

services required. Once the APs have been installed, they securely receive any additional configuration and management data from the centralized PCM Networking Wireless Service over the Internet.

New or additional APs are quickly deployed and provisioned from the PCM Networking Wireless Service in order to increase local density at an existing location or to expand into new

no need to worry about security since customer data transmission is never touched or seen by the PCM Networking Wireless Service, while all management traffic is protected using strong encryption.

Technology is changing faster than ever and requires great skill and expertise to maintain IT investments throughout its lifecycle. Trusted by customers for more than two decades, PCM provides

The PCM Networking Wireless Service maintains management and control systems for each customer.

geographies to meet and needs of the growing business.

The PCM Networking Wireless Service maintains management and control systems for each customer contained on dedicated virtual machines. PCM provides simplicity and peace-of-mind operations through centralized management via the cloud, eliminating the cost and day-to-day management of traditional Wi-Fi solutions. There is also

complete solutions with the required technology, installation and support Services to provide you the highest level of expertise and professional oversight of your IT operations. ■

hp Introducing ProLiant Gen8

HP's Industry's leading servers just got faster, smarter & more efficient!

An intelligent, highly scalable, efficient infrastructure is required to meet the challenges in the new style of IT. And once again HP is leading the way to meet these demands.

HP ProLiant servers, the world's most intelligent servers, just got faster, smarter and more efficient so your business can embrace this technology shift. The next wave of ProLiant Gen8 innovations are designed to deliver the intelligence necessary to optimize your data center and accelerate performance to support a wide range of complex IT demands from Cloud-based applications to Social Media, Big Data, and Mobility in a virtualized environment.

With an intelligent and efficient data center based on the leading HP Converged Infrastructure strategy, you can build a strong foundation for your business and protect your infrastructure investments. These customer-inspired innovations deliver real business results with a 5 month ROI, helping you transform your data center to better compete and grow your business today, while being ready for what's next.

Invest in your future today and start to realize the cost savings in your new style of IT in a few short months.

Entry-level server performance

The HP ProLiant ML350p Gen8 Server series is the latest generation of the best-selling ProLiant ML servers delivering best-in-class performance, availability and maximum expandability for remote branch offices of large enterprises, growing businesses and data centers.

Availability

User-inspired design features that prevent data loss, reduce downtime, and improve serviceability include HP SmartDrives, HP Smart Storage, HP Smart Socket guides, and tool-less access to components.

Expandability

Provides plenty of room to grow to meet future needs with options for a second processor, PCIe slots, HP Smart Memory with capacity up to 768GB, and internal storage configurations with up to 24 SFF or 18 LFF hard drives.

Serviceability

HP SmartDrive technology improves serviceability and prevents data loss with features such as icon-based status display and "Do Not Remove" LED.

HP ProLiant ML350p G8 Server

Oracle® Maximizes the Value of SPARC T5 Servers with Sun ZFS Storage Appliance

SPARC T5-2 Servers

Oracle's cutting-edge SPARC T5-2 server is an ideal platform for business-critical applications that demand an elite level of computational performance. This versatile, two-socket system provides extreme compute density with 32 cores and up to 512GB of system memory — all within a 3U enclosure.

- World-record performance
- Unmatched price for the performance
- Supports Oracle Solaris, the most widely used UNIX OS for enterprise computing and cloud infrastructure
- Built-in virtualization with Oracle VM Server for SPARC
- Highest levels of reliability, availability, and serviceability
- Runs Oracle Solaris 11 and Oracle Solaris 10

With full support for Oracle Virtual Networking for data center fabric, the SPARC T5-2 reduces infrastructure complexity and cuts operating expenses.

Add an extra layer of intelligence to your storage systems with Sun ZFS

Oracle ZFS Storage ZS3-2

Performance, Efficiency, and Oracle Integration Oracle's application engineered storage system delivers extreme efficiency and better value, reducing cost, complexity, and risk while increasing performance.

The Sun ZFS Storage Appliance is Oracle's preferred NAS storage system with unified storage capabilities for enterprise tier-1 environments. It offers a rich set of enterprise-class data services, industry-leading performance, and Oracle Hybrid Columnar Compression for Oracle Databases.

These systems also feature a comprehensive, intuitive user interface and analytics environment that offers unmatched ease of use and simplicity. This reduces operating expenses by dramatically reducing management time and complexity. Plus, the Sun ZFS Storage Appliance design automatically optimizes performance over storage tiers, delivering breakthrough performance and simplifying storage management.

- Engineered specifically for SPARC T5 servers
- Maximize return on Oracle software investments
- Extreme performance • High availability
- Superior price per performance and price per gigabyte
- Industry-leading Backup/Recovery performance
- Lower TCO than competitive systems

Get compact performance in all dimensions

The C260 M2 server has CPU enhancements for greater **performance, expandability, and security** — as well as reliability, availability, and serviceability (RAS) features.

Cisco UCS C260 M2 Rack Server with Intel® Xeon® processor

The Cisco UCS C260 M2 Rack Server is one of the industry's highest-density, 2-socket rack server platforms. This important new building block in the Cisco Unified Computing System (Cisco UCS) portfolio offers compact performance for enterprise-critical applications.

Future-proof performance

Cisco UCS C260 M2 servers extend Cisco unified computing innovations — including Cisco Extended Memory Technology — to an industry-standard, rack-mount form factor. Plus, it is the first rack-mount server available anywhere with a built-in future migration path to unified computing, giving you the flexibility you need to handle the demands of today with an eye towards the dynamic needs of tomorrow.

Better performance, lower costs

For IT departments that are looking to increase compute performance, memory capacity, internal storage, or I/O capacity, the Cisco UCS C260 M2 server delivers on all fronts. This expandability allows you to decrease costly licensing fees by increasing

performance without adding new CPU sockets. Applications that are memory-bound today will benefit from more than 1TB of addressable memory that the Cisco UCS C260 M2 server offers.

Key Features

- 10-core Intel® Xeon® processor E7-2870 (30MB cache, 2.40GHz)
- 128GB DDR3 SDRAM, expandable to 1TB
- 16 hot-swappable drive bays
- Quad-port Intel® Gigabit ET network adapter
- Two 1200W power supplies
- Includes RAID Battery Backup Unit, 2 x CPU Heatsink, rack rail kit
- Comes with 3-year limited warranty replacement and next business day response time

Dell PowerEdge VRTX Integrates servers, storage, networking and management into a single chassis

PartnerDirect
Premier

The Dell™ PowerEdge™ VRTX is a powerful, scalable, easy-to-manage solutions platform, optimized specifically for office environments. The optimized platform integrates up to four PowerEdge M-series server nodes, storage, networking and management into a compact 5U chassis. Integrate networking through the 1GbE internal switch module or an optional Ethernet pass-through module with eight 1GbE ports.

Take advantage of flexible, expandable I/O with eight PCI Express® (PCIe) slots — three full height/ full-length and five low-profile/half-length. Capitalize with redundant 1100W AC power supplies, fans, blower modules, and chassis management controllers.

- Integrated IT solution, optimized for office environments
- Simplified systems management
- Up to four 2-socket, half-height PowerEdge M620 and M520 server nodes, or up to two 4-socket, full-height M820 server nodes
- Up to eight PCIe slots
- Up to 48TB storage capacity in chassis

Readily accommodates new workload requirements, while protecting existing investments in hardware, software, management tools and skills.

FEATURE-RICH BUILT-IN VALUE.

lenovo FOR
THOSE
WHO DO.

The Lenovo ThinkServer RD340 is a highly efficient, 1U rack server loaded with built-in features at a great price.

BALANCED PERFORMANCE

What does balanced performance mean? It means the Lenovo ThinkServer RD340 is loaded with features and packaged in a slim, 1U design. Up to two Intel® Xeon® E5- 2400 v2 Series processors give you outstanding performance. With reliability features such as hot-swap hard-disk and solid-state drives, integrated RAID, and redundant power and cooling, you get peace of mind that your data will stay safe and your system will stay up and running. This enterprise-class server packs in the computing power to run your demanding infrastructure, collaboration, and line-of-business applications.

BUILT-IN VALUE

When you think of value in the server space, you expect a rich set of features for a great price. That's what you get with the ThinkServer RD340. It sports a dual-socket design and Intel® Xeon® processors with up to 10 cores each — giving you a 25 percent boost in performance over previous generations. You'll also find generous memory and storage capacity with support for up to eight hot-swap hard drives. That's 16TB of total storage. You'll enjoy enterprise-tough performance with the right built-in features in a scalable, 1U power-efficient solution — at a budget-friendly price. Now that's value.

SMART POWER MANAGEMENT

Let the Lenovo Smart Grid power management tool help you save on power. Monitor real-time power data based on parameters you define and receive alerts based on custom power events. Smart Grid scales with you and can manage up to 1,000 nodes. It provides sophisticated, policy-based, dynamic power capping functionality to help you better manage power to changing server workloads. It's smart technology that pays you back. In addition to Smart Grid, a suite of ThinkServer lifecycle management tools are available for your use at no additional charge.

The most productive app for business.

Microsoft
Office 365

Why Office 365 is worth the upgrade?
Your business evolves. So does Office 365.

Your complete Office in the cloud

Office 365, unlike earlier versions of Office, can be installed on several devices. Wherever you are, online or offline, you can get to—and work with—the most up-to-date versions of the files and tools you need to get things done.

Platform Compatibility

Many companies can't afford to spend a lot on upgrading their desktop systems to the latest operating system. Office 365 is well aware of that, which is why it supports not only Windows 7 and Vista, but OS X 10.5 or 10.6 as well.

Cloud Connectivity

Office 365 lives in the cloud. Documents are saved simultaneously to the cloud and your device's hard drive. Your subscription also includes services like free additional 20GB of OneDrive storage per user and 60 Skype minutes per month to call mobiles in 8 countries and landlines in 60+ countries.

The familiar Office, only better

Office 365 is the Office you already know. There is no need to learn everything all over, so you can just focus on getting things up and running.

One convenient subscription for up to 5 people with no-hassle automatic upgrades!

The premier productivity suite

Office 365 Home Premium

Welcome to the next generation of Office, a powerful service that keeps you connected whether you're at home or on the go. Complete with Word, Excel, PowerPoint, OneNote & Outlook

Office 365 Home Premium has the latest version of the applications you know and love, plus cloud services so you can have Office when and where you need it. Just sign in and you can get access to your Office files, applications, and settings from virtually anywhere.

The latest versions of all our best-in-class applications plus cloud services including Skype and SkyDrive on up to 5 PCs, Windows 8 tablets, Macs, and up to 5 select mobile devices - including iPhones, and Android phones (Office Mobile is available on Windows Phones and does not count toward the 5-device limit).

- Office for the entire household on up to 5 PCs, Windows 8 tablets, Macs, and up to 5 select mobile devices - including iPhones, and Android phones.
- The latest versions of: Word, Excel, PowerPoint, Outlook, OneNote Publisher, and Access.
- An extra 20 GB of online storage per household member in SkyDrive (up to 5 users).
- 60 minutes of Skype™ calls each month to phones in 40+ countries.
- One convenient annual subscription for the whole household with automatic upgrades included so you're always up to date with the latest features and services.

IS YOUR SYSTEM SAFE?

monitoring across virtual and physical infrastructure, PCM's team of Solutions and Services experts can confidently accelerate your virtualization initiatives to include even the most critical of applications and services.

Software Security Solutions to Secure your Technology

PCM's portfolio of Software Security ensures your data travels safely because securing your data should be your company's top priority as data breaching is more common than ever. Don't let your company become part of the statistic. Invest in the proper security software to prevent potential

infiltrations in the future. PCM offers security suites from industry leading brands like Symantec, Microsoft, VMWare, and many more.

We also offer specific security packages such as anti-virus software, firewall software, encryption software, and anti-spam software solutions.

How PCM can help

Our Experts: PCM's experienced solution architects receive the latest industry training in new security developments and understand the threats in the virtual environment, so they can help every step of the way.

Our Partners: PCM partners with top security vendors to provide the solutions that best fit the needs of your company. **Our Plan:** We'll create a strategic approach customized to meet your business needs. This means we're there for you from planning and deployment, to management and support. Our team of subject matter experts will provide you with class leading services. ■

Contact your PCM Account Executive today to learn how PCM can help you implement the right Software Security Solution for your company.
1-800-700-1000 | www.pcm.com

Make Software Security a Key Element of Your Business Continuity

Organizations worldwide are increasing their reliance on technology to protect their computing environments and data. With this, the idea of Software Security is seemingly becoming as important as ever. The tremendous potential costs associated with security incidents, the emergence of increasingly strict and

complex regulations, as well as the continued operational costs associated with stay up to date with security patches all require one focus. Organizations must give careful consideration to how to address the appropriate software security.

Top Notch Protection and Compliance for Business

Antivirus and security software protects computer networks from security threats brought by viruses, Trojans, worms, spyware, and adware. This software is designed to detect these applications and remove them from computers, ensuring the security of data. Data security is one of the major concerns of many companies today.

Various forms of malware have been used to illegally obtain data from computer networks, and these malicious applications usually spread through the Internet. Viruses, Trojans, and worms are likely to leave computers defective, resulting in a decrease in productivity and even loss of intellectual property. This is why it is wise for businesses and organizations to invest in antivirus and security software.

Mitigate the risks introduced and achieve even greater protection than you thought possible in a purely physical environment. Whether you are trying to prevent unauthorized access, maintaining isolation and separation of systems, discovering and monitoring sensitive data or consolidating log

Backup solutions are strategically put in place to ultimately recover data.

PCM Terms of Use & Sale

- All returns require a return authorization number. Requests must be made within 15 days of purchase. Returns may be subject to a minimum 15% restock fee. The amount refunded will be the lower price of either the date of purchase or date of return.
- To request a return authorization number, please call your Account Executive at the phone number listed on the front of this packing slip.
- Tape the return label provided to you on the box and ensure the return authorization number is clearly marked. Do not write on the original manufacturer's box.
- Returned product(s) must be complete including manufacturer's original package, accessories, software and manuals. Incomplete returns may be refused.
- A product must be received in our warehouse within 10 business days from the date the return authorization is given.
- The customer is responsible for all return shipping costs. COD shipments will not be accepted.
- We are not responsible for lost or stolen packages. We recommend using a courier that can track your package with a tracking number.
- Pack your return securely. We recommend insuring it for your protection.
- All other policies are in accordance with the policies published in our latest catalogs and on our website www.pcm.com.
- We are not responsible for integrity or backups of data on any drive returned to us even if included in a system.
- Subsequent to an approval authorization, a credit to an account or issuance of a check can take up to 30 days.
- Missing a rebate? Look it up on our website: www.pcm.com or call your Account Executive.

Terms/Warranty Disclaimer. PCM expressly disclaims all expressed or implied warranties. Including any implied warranty of merchantability or of fitness for a particular purpose non-infringement. PCM shall have no liability to anyone for incidental or consequential damages or any other liability, loss or damage arising out of or related to the merchandise sold. All merchandise is so "AS IS".
