

Server Protection

Sophos Server Protection defends your data from malware without sacrificing server performance.

One license includes agentless antivirus for vShield and our full antivirus client for Windows, Linux, UNIX and Mac. Manage them all through the easy-to-use Sophos Enterprise Console. It's server security made simple, only from Sophos.

Highlights

- ▶ Protects Windows, Linux, Mac and UNIX systems from the latest threats
- ▶ Supports vSphere, Hyper-V and XenServer
- ▶ Minimizes resource use for optimal server performance
- ▶ Includes Antivirus for vShield to provide efficient agentless scanning on vSphere
- ▶ Keeps licensing simple so you can focus on other priorities
- ▶ Lets you manage all your systems from one easy to use console

High security, low impact

How do we deliver great protection without compromising performance? It starts with innovative features like pre-execution emulation for identifying suspicious behavioral patterns, and in-engine caching, preventing needless rescanning of files between updates. Frequent, lightweight definition updates keep your protection current without causing network congestion. And Live Protection looks up unknown and suspicious files in real time, keeping your servers secure, even between updates.

Optimized for virtual environments

We've optimized our Windows antivirus client to take advantage of the unique characteristics of virtual platforms, like memory sharing and gold image deployment. Our Virtualization Scan Controller lets you stagger scan times, minimizing resource conflicts. And Antivirus for vShield makes it simple to integrate agentless antivirus protection into your VMware environment. It reduces resource use, eliminates scan and update storms and protects Windows virtual machines as soon as they come online.

One server, one license, any platform

Simply purchase one license for each physical or virtual machine running a server operating system. Install our endpoint client for Windows, Linux, Mac or UNIX, or protect your servers using our agentless Antivirus for vShield. Migrate between them without spending time or money navigating complex, inflexible licenses.

Easy-to-use central console

Sophos Enterprise Console is easy to use, so you'll spend less time learning and more time doing. Manage all of your servers, workstations and vShield virtual security appliances from one consistent interface. Role-based administration lets you offload daily tasks, while instant reports put the information you need right at your fingertips.

Technical Specifications

	Supported platforms	System requirements	Supported languages
Windows client	Windows Server 2012 (64-bit), 2008 R2 (64-bit), 2008 (32-bit or 64-bit), 2003 R2 (32-bit or 64-bit), 2003 (32-bit or 64-bit), Windows SBS 2011 (64-bit)	Disk space: 500 MB minimum RAM: 512 MB minimum	English, French, German, Italian, Japanese, Spanish, Simplified Chinese and Traditional Chinese
Linux client	Asianux 3.0 Server Novell Open Enterprise Server 2.0, 11 Red Hat Enterprise Linux ES5, AS5, Server 6 SUSE Linux Enterprise Server 10.0, 11.0 Ubuntu Server Edition 10.04, 12.04	Disk space: 1 GB minimum RAM: 512 MB recommended	English, Japanese
UNIX client	AIX 6.1, 7.1, HP-UX (Itanium) 11.23, 11.31 Solaris (Sparc and Intel) 10, 11 FreeBSD 7, 8 (basic antivirus scanning, no central management)	Disk space: 1 GB minimum RAM: 512 MB recommended	English, Japanese
Mac client	Mac OS X 10.6, 10.7, 10.8 (Intel 32-bit or 64-bit)	Disk space: 150 MB minimum RAM: 512 MB minimum	English, French, German, Spanish, Japanese

	Supported platforms	Windows guest system requirements	Sophos virtual security appliance system requirements	Supported languages
Antivirus for vShield	VMware vSphere 5.1 with vShield Endpoint 5.1	vShield Endpoint thin agent (available in VMware Tools) installed SCSI controller installed See also VMware's list of supported guest operating systems for vShield Endpoint.	CPU: 2 cores Disk space: 16 GB RAM: 2.5 GB	English

	Supported platforms (management server and remote console, unless otherwise noted)	Supported databases (all 32-bit or 64-bit)	System requirements	Supported languages
Enterprise Console	Windows Server 2012 (64-bit), 2008 R2 (64-bit), 2008 (32-bit and 64-bit), 2003 R2 (32-bit and 64-bit), 2003 (32-bit and 64-bit), Windows 8 (64-bit; remote console only), Windows 7 (32-bit and 64-bit), Windows SBS 2011 (64-bit), Windows Vista SP2 (32-bit and 64-bit; remote console only), Windows XP Pro SP3 (32-bit and 64-bit; remote console only)	SQL 2005, 2008, 2012 SQL 2012 Express Edition (database size limited to 10 GB) SQL 2005, 2008 Express Edition (database size limited to 4 GB)	Disk space: 500 MB minimum RAM: 1 GB minimum	English, French, German, Japanese, Italian, Spanish, Simplified Chinese and Traditional Chinese
