

Top 10 Reasons to Choose Veeam

Veeam® Backup & Replication™ isn't the only way to back up your modern data center...but it is the best way.

While many physical backup tools can now perform image-based backups of virtual machines (VMs), only Veeam fully leverages the virtual environment to reduce the cost and increase the value of backup—not just a little, but a lot.

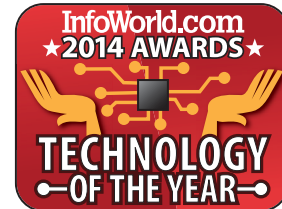

Built for the modern data center

That's why so many organizations have said "Enough!" to the shortcomings of legacy backup tools, and have instead switched to Veeam. Whether you have thousands of VMs or just a handful, Veeam Backup & Replication is the best choice for your VMware vSphere, Microsoft Hyper-V or mixed hypervisor modern data center environment.

Veeam provides fundamental and far-reaching advantages over legacy backup vendors.

Here are the top 10 advantages according to Veeam customers and partners:

	Veeam Backup & Replication	Physical Backup Tools
1. Agentless	✓	✗
2. Built-in advanced replication	✓	✗
3. Instant VM Recovery™	✓	✗
4. Instant File-Level Recovery	Any OS and file system	Windows, maybe Linux
5. Instant application-item recovery	Any application and OS	Select applications only
6. Automated recovery verification	✓	✗
7. Built-in, source-side compression and deduplication	✓	✗
8. Simple offsite backups	✓	✗
9. Storage agnostic	✓	✗
10. Easy to deploy and configure	15 minutes to self-setup	Weeks of extensive deployment

Veeam Backup & Replication was selected as one of InfoWorld's best products of the year in 2014

Veeam Backup & Replication was selected as a finalist in the Backup and Recovery category of the Windows IT Pro Best of TechEd 2014 awards

"A major reason that organizations still hit these bumps on the backup and recovery road: They use the same products for both physical and virtual server backup, when we all know that virtualization requires a fundamentally different approach."
