WORRY-FREE BUSINESS SECURITY SERVICES

Hosted security services for Windows, Mac, and Android devices

Worry-Free™ Business Security Services is a hosted service that is a snap to install and easy to manage. It will provide your business with industry-leading protection for your Windows, Mac, and Android devices. Now, you can manage your business devices from anywhere and always feel confident that your data is safe.

Worry-Free Business Security Services is powered by the **Trend Micro Smart Protection Network**™ - a worldwide early warning system that blocks threats before they can reach your business machines. Your devices will have constant access to the latest threat information.

Even security for remote workers or branch offices can be managed via the Internet with the Worry-Free Business Security Services' web-based console. So security policy or settings can be pushed to everyone on staff, no matter where they are located. Now, there's no need for remote workers to be under LAN or VPN to get the latest protection policy. It also updates automatically, so there's no need to spend time and resources on patching or updates.
NO SERVER REQUIRED FOR PROTECTION AGAINST VIRUSES, DANGEROUS WEBSITES, AND LOSING DATA

Worry-Free Business Security Services protects against viruses, dangerous websites, and other threats. As a hosted or cloud-based service, no server and no maintenance are required. This means you can quickly deploy your security. It's protection that is easy to use and manage, even for a non-IT person. In short, your time and resources can be better spent on your strategic business projects and priorities instead of worrying about your IT security.

WORRY-FREE™ REMOTE MANAGER FOR YOUR IT SERVICE PARTNER

If you'd rather have your trusted IT services partner monitor your security status and alerts, **Trend Micro Worry-Free™ Remote Manager** provides an intuitive management console that allows your IT partner to remotely manage Worry-Free Business Security Services for you.

Worry-Free Remote Manager can now also be integrated with industry-leading RMM/ PSA tools like ConnectWise, Kaseya IT automation framework, and Autotask, to simplify support and customer management for MSPs that leverage these solutions.

> " *Trend Micro provides us with the security our university needs to digitally operate in today's computer-enabled education system.* "
