We can provide qualified candidates for your local or nationwide projects, as well as recruiting for both short-term positions and long-term placements.

Get the short- and long-term IT help you need

We can help you with the unpredictable demands a growing company can put on an IT department. In many cases, it may not be within your strategic interest to hire full-time employees for short-term projects. We can provide staff for projects managed by your team, such as IMAC, service desk, and desktop support. We can also bring on specialized personnel during intensive implementations, encompassing storage, messaging, security, servers, mobility, backup, virtualization, and network infrastructure.

We provide the flexibility and varied skill sets you need to complete your projects while helping you maintain budgetary control over variable costs and human resources. We work with you to define the necessary skill sets and then deliver the right resources to fill all of your business requirements.

Wide-ranging Strengths:

- ▶ Service desks and telephone-based technical support
- ▶ Desktop management that provides field support at the desktop level
- ▶ Data center deployment and management
- ▶ Network infrastructure and security

- ▶ IMAC
- ▶ Mobility and BYOD
- ▶ Backup environments
- ▶ Virtualization
- ▶ Storage and servers
- ▶ Messaging and archiving
- ▶ Asset management
- ▶ Packaging and image management

Specialties Include:

- ▶ Decentralized or campus environments
- ▶ High-turnover positions
- ▶ Coverage for dynamic business environments experiencing spikes in IT activity

We deliver qualified IT professionals to companies looking to successfully deploy short- and long-term personnel. Contact your Account Executive today to start your search.
