PCMG Offers:

Smart IT Solutions for Education

For close to twenty years, PCMG has been serving the needs of educational institutions, from K-12 to Higher Education. PCMG's education team is ready to serve any need, whether it's a single item purchase or a complex procurement.

Our goal is to always offer the leading solutions and services that are required by our education customers at competitive prices, with fast delivery, and with outstanding service. From notebooks to the data center — and everything in between — PCMG offers what you need to meet your school's IT mission.

Tablets & Accessories

The perfect balance of mobility and productivity

Fujitsu STYLISTIC® Q702 Hybrid Tablet PC

In the not too distant past, you had to choose between performance or portability. Laptops offered a lot of power but were not nearly as mobile as a tablet. Now, with the Fujitsu STYLISTIC Q702, you get the best of both worlds — the raw computational might of a dedicated laptop and the go-anywhere attitude of a tablet.

At the office or on the road, the STYLISTIC Q702 keeps you connected and effective. The 3rd generation Intel® Core™ processor rips through tough tasks while the built-in webcam lets you contribute to meetings from anywhere. And since it comes with Windows® 8, all your regular office apps works perfectly.

- 3rd gen Intel® Core™ i5 vPro™ processor (3MB cache, 2.80GHz)
- 11.6" touchscreen display
- 4GB DDR3 SDRAM
- 128GB flash storage
- 802.11a/b/g/n Wi-Fi • Bluetooth 4.0
- 5 MP rear-facing camera, 720p front-facing webcam
- Windows® 8 Pro 64-bit

only **\$1669⁹⁹** #9425630

wacom®

Wacom Bamboo Stylus Duo

The Wacom Bamboo Stylus Duo combines the performance of Wacom's Digital stylus for touchscreen devices with a traditional ink pen tip, allowing you to draw, sketch, take notes, and express yourself creatively on your tablet, your smartphone, or even an old-school pad of paper.

- Combines a stylus and inking pen to provide a premium experience in both worlds
- Its 6mm tip is 25% slimmer than other styluses
- Weight-balanced design to feel right in your hand
- Soft rubber rings for a smooth cap fit

only **\$32⁹⁹** #9105311

Belkin Portable Keyboard Case for iPad mini

Type faster, view media more comfortably, and protect your tablet from bumps with the Belkin Portable Keyboard Case. Custom designed for your iPad mini, this combination case and keyboard holds your tablet at the perfect angle and links wirelessly over Bluetooth.

- Built with a tough outer layer and soft inner lining
- The well-spaced keyboard keys help accelerate your typing speed while reducing typos
- Up to 155 hours of active battery life on a single charge
- Equipped with camera lens cutouts

Manage and secure all your mobile devices

BlackBerry Enterprise Service 10

With the growing diversity of mobile devices and platforms in the workplace, a multitude of security requirements, and the rise in mobile app use, there are significant challenges ahead for IT departments. To overcome these obstacles, you need a new approach that embraces Enterprise Mobility Management (EMM). You need BlackBerry® Enterprise Service 10.

- Single, intuitive management console to manage all your devices, users, groups, apps, and services
- Full Mobile Device Management (MDM) for BlackBerry 10 smartphones and BlackBerry® PlayBook™
- Full MDM for iOS and Android devices
- BlackBerry® Balance™ for a secure and separate work space and personal space
- BlackBerry® World™ for Work: the integrated corporate app store
- Secure connectivity with end-to-end encryption
- Unified Communications for truly integrated voice, messaging, PIM, apps, and social experiences

Video conference with crystal clarity

Logitech C920 HD Pro Webcam

With full 1080p HD video calling across Skype and 720p for most IM apps, the Logitech C920 gives you a truly face-to-face experience when you're continents away.

- Dual stereo mics capture your voice more naturally
- Uses H.264 encoding for a faster, smoother experience
- Captures stunning 15 MP still images

The C920's 20-step autofocus technology ensures razor-sharp video results.

only **\$107⁹⁹** #8981335

The adjustable extender base lets you set the camera at the perfect height.

Logitech BCC950 ConferenceCam

Make your video conferences more collaborative and productive with the BCC950 ConferenceCam. Combining 1080p quality, a fully duplexed speakerphone, and 180° motorized panning, it creates a fully immersive experience.

- Optimized for most Unified Communications applications, including Microsoft Lync, WebEX, and Skype
- Its noise-canceling mic lets your voice ring through
- 78° field of view and 180° pan captures everyone in the room

We Simplify Enterprise Mobility™

Securing Mobility in the Public Sector

AirWatch® provides a comprehensive enterprise mobility management solution to securely manage and deploy mobile devices, application, content, and email to both internal and employee-owned devices in your agency. Our flexible platform enables you to deploy fully integrated or stand-alone device, application, and content management solutions.

Devices

User authentication, encryption, policy enforcement, automated compliance, remote lock, and wipe

Applications

App SDK and Wrapping, App Catalog, assignment rules, whitelists, blacklists, restrictions, and kiosk mode

Content

Secure container with authentication, file encryption, geofencing, sharing, and offline viewing restrictions

Our advanced security capabilities protect your sensitive data — from protected internal communications to financial documents — and ensure that your end users have around-the-clock, secure access to the information they need.

Call 1.800.625.5468 or visit pcmg.com

MOBILITY

THE NEW IT REALITY HAS ARRIVED

Mobile device usage is overtaking traditional forms of computing, including desktops and laptops. Many industry experts predict the use of mobile devices will surpass traditional systems in the next year, and that's only a part of the story in the changing IT landscape.

Mobile devices extend the workplace, promising improved productivity and collaboration. But Bring Your Own Device (BYOD) policies are causing the latest paradigm shift in the workplace and IT management. BYOD introduces new risks to information security, compliance, and policy controls.

Mobile device use and security must be carefully managed in order to protect the security of both your organization's physical assets and its sensitive information. According to an Info-Tech Research study, up to 30% of mobile devices are lost or stolen along with their corporate data and intellectual property.¹ In a BYOD environment, every misplaced smartphone, tablet, or laptop is a potential gateway to your sensitive systems. When users can access and modify data on unsecured devices, it creates additional risks for information control, malware, data corruption, and theft.

How PCMG Can Help

With the explosive demand for enterprise mobility solutions, PCMG stands at the forefront of Managed Solutions. Offering a holistic and secure solution providing end-to-end systems support, we can dramatically increase your organization's productivity while lowering your overall operating costs. With workforce solutions oriented around user success and significant reductions in IT staff, we drive down your Total Cost of Ownership (TCO) while producing a true solution.

With more than twenty years experience and dedicated processes, the

PCMG experience is the top of the game. The entire process is managed and maintained wholly within PCMG, which makes us a true single-source provider. Plus, our comprehensive service offerings cover the entire mobility process, from pre-deployment planning through device management and on to lifecycle management.

Planning

As with the introduction of any new technology into an organization, it is important to plan a solution that is custom tailored to pair perfectly with the way your organization uses mobile devices. Our consultants utilize their vast experience in Enterprise Mobility to help you design the correct solution for you and your users.

Acquisition

As one of the largest corporate resellers in the nation, we have access to the right products at the right price to help you get the most out of mobility in your organization. Leveraging our relationships with top-tier technology vendors, such as Apple, Cisco, HP, MobileIron, AirWatch, and Fiberlink, we are uniquely positioned to help you succeed.

Deployment

Deployment Services are processes designed to efficiently receive, image,

ship, and deploy mobile devices based on the System Image(s) developed and tested through Lifecycle Management. This service leverages PCMG Integration and Distribution Centers and is fully scalable and repeatable for large deployments of mobile devices.

Management

Mobile Device Management (MDM) is the software and process that enforces configuration and security policies for mobile devices across your organization. By leveraging the solution, you can standardize application and policy settings across all devices regardless of manufacturer, model, owner of the device, geographical location, and more.

Service Desk Support

Service Desk Support for Enterprise Mobility Services include both end-user support and device hardware support. Our experienced U.S.-based Service Desk technicians take your calls, answer questions, and provide expert guidance regarding all aspects of the Enterprise Managed Mobility service offering.

Technology Lifecycle Management

Lifecycle Management is a core function of the Enterprise Managed Mobility service offering. By managing both corporate-owned and employee-owned

devices (BYOD), you benefit through standardized configuration, support, and policy enforcement throughout your organization.

Success Starts at PCMG

Successfully managing mobile devices is critical in today's workplace and can result in many business and workforce benefits. The cost of doing nothing will only delay the inevitable and increase risks to sensitive information and regulations as today's technology savvy workforce finds readily available workarounds, easily downloaded from "app stores" to enable access and off-line-storage of information assets. We stand at the forefront of Managed Mobility Solutions, and we're ready to help you gain control of this rapidly changing environment.

About the Author

Greg Hacke is a member of the Apple and Mobility Consulting team with responsibilities for training as well as serving as a strategic consultant around mobile technologies. Working in the secure mobility space, he has worked with organizations in nearly every business vertical to ensure timely and secure mobile deployments around the globe.

Meet the all-new Windows 8 Pro

The best Windows ever

Windows has a new beautiful, fast, and fluid design. With Windows 8, you can use touch as well as a mouse and keyboard together to do what you want, the way you want. And because it works alongside existing Windows 7 systems, apps, and peripherals, it easily integrates into virtually any environment. The same keyboard shortcuts, management tools, security features, and deployment options are still available in Windows 8 – only better.

Modernize your tools

Today's Windows 8 PCs are the best ever with a full line-up of tablets, convertibles, and laptops. The amazing new designs are thinner, lighter, faster, and provide the latest security technologies. Windows 8 offers the familiar desktop you use today plus faster boot times, longer battery life, less memory use, and amazing new features such as live tiles, search, and touch.

Have it your way

With Windows 8, you don't have to compromise. Because it's built to run on existing hardware, multiple processor platforms, and new and emerging devices such as notebooks, Ultrabooks™, and tablets, Windows 8 delivers experiences individuals love and enterprise-grade solutions that IT professionals need. The Windows 8 shared-core architecture enables your organization to write apps that can be shared easily across all devices. Regardless of form factor, your Windows 8 experience is fast, fluid, and effortless.

A great Windows experience no matter the device. From tablets and convertibles, to laptops and desktops.

 Windows 8 Pro

There's no comparison

Windows 8 PCs are faster, more secure, and take full advantage of today's technology

	Windows XP Professional*	Windows 7 Professional	Windows 8 Pro
Productivity	Start Screen with live tiles brings everything you care about front and center		✓
	Great apps built-in such as Mail, Calendar, Messaging, and SkyDrive, with many more available at Windows Store		✓
	Snap, Peek, and Shake features improve multi-tasking and save time		✓
	Lookthrough apps, documents, and your entire PC with one simple Search		✓
	Works with Windows desktop software, including the full Microsoft Office experience	✓	✓
Security	Run many older Windows XP productivity apps with Windows XP Mode	✓	
	Includes Internet Explorer 10 for more secure, fast, intuitive browsing		✓
	Trusted boot helps ensure your device is secure every time it starts up		✓
Mobility	Provides enhanced data protection with BitLocker and BitLocker To Go drive encryption		✓
	Enables you to connect to your PC when you're on the go with Remote Desktop	✓	✓
	Access important network files even when you're not connected with Offline Files	✓	✓
Control	Location Aware Printing automatically prints to the correct network printer, whether at home or at work		✓
	System reset/refresh lets you easily reset your PC to original manufacturer settings with one click		✓
	Connect to your business network with domain join and manage devices, security, and IT policies on multiple PCs through Group Policy	✓	✓

Optimized for Windows® 8

32GB HP ElitePad 900 G1 Tablet

Go beyond everyday business with the HP ElitePad. Powered by the latest Intel® Atom™ processor, this premium thin and light Windows® 8 tablet puts productivity and efficiency right at your fingertips.

It expands its potential with a complete suite of accessories designed to help you do more. Easy to deploy and manage with enterprise-class security, the HP ElitePad moves your entire business ahead.

Low profile, high impact

With high-quality materials and craftsmanship, the HP ElitePad both looks great and works hard — from the boardroom to the warehouse. The Corning® Gorilla® Glass 2 and machined aluminum make it tough enough to survive life on the road. In fact, HP put the ElitePad through the ringer, subjecting it to 115,000 hours of testing and end-to-end diagnostics. And when the dust settled, the ElitePad was still going strong.

Engineered with IT in mind

HP ElitePad is designed to work with your existing IT environment and gives you a familiar enterprise-class setup experience. HP Global Services and HP Custom Integration Services make it easy to deploy the ElitePad across a worldwide enterprise.

- Dual-core Intel® Atom™ processor (1MB cache, 1.80GHz)

HP's pint-sized PC powerhouses

Surface space is precious real estate in any office. Old-school desktop PCs used to be real desk hogs, but HP is changing the rules of the game. Their innovative line of Small Form Factor PCs squeezes powerful computing

strength into an ultra-compact chassis for the ultimate blend of speed and size. Even though these systems sport a small footprint, they still have room to grow with more memory, larger storage drives, and graphics cards.

HP Compaq 6300 Pro Small Form Factor PC

Intense workstations for demanding jobs

Editing videos, designing 3D CAD drawings, and manipulating photos — big jobs demand a lot of processor power. Base-model PCs just don't have the backbone for these types of creative projects, but the HP Z-Series of

workstations is up to the task. With strong Intel® Xeon® CPUs and lots of room for upgrades, they're perfect for power users. Contact your Account Executive for more details about these robust systems.

HP Z-Series Workstations come with the latest Intel® Xeon® processors for unparalleled performance.

The Intel® Xeon® E5 Family

Versatile processors for today's flexible, efficient data centers.

Oracle* and Intel®

Oracle x86 systems deliver record-breaking performance with the Intel® Xeon® processor E5 Family

By Ed Franklin, x86 Product Manager, Oracle

ORACLE®

Servers, workstations, and storage solutions based on the new Intel® Xeon® processor E5 family deliver the best combination of performance, built-in capabilities, and cost-effectiveness to make data centers more flexible and efficient. From virtualization and cloud computing solutions to design automation or real-time financial transactions, you'll be delighted by better than ever performance no matter what tasks you face.

Intel® E5 family processors help future-proof your data center.

Your investment in industry standard technology from Intel — combined with innovative solutions from other technology partners — helps future-proof your data center with an infrastructure that grows right along with your organization.

Scale innovative private cloud services

Today's private clouds enable greater business agility and efficiency by delivering innovative and scalable services that drive value back into the organizations they serve. Building and managing these services require systems that scale to meet your ever changing needs, while delivering solutions to the challenges IT managers face every day. Server and storage platforms based on the Intel® Xeon® processor E5 family are built to be at the heart of today's data centers and enable powerful, versatile private cloud solutions.

E5 processors: a new performance sweet spot

The Intel® Xeon® processor E5 family support key cloud requirements that make your data center agile and more responsive to changing business needs. Maintaining industry leadership for power efficiency and continuing Intel® Xeon® processor performance advancements, the Intel® Xeon® processor E5 family gives you additional performance when you need it for single- and multi-threaded

applications, including increased floating-point performance for technical computing workloads.¹

Intel® Xeon® processor E5-based platforms strengthen data protection with built-in, hardware-based capabilities that encourage pervasive data encryption with a significantly reduced performance tax.² Plus, to enhance cloud security and simplify migrations, you can pool resources and establish a hardware "root of trust" that enables dynamic migration of VMs from one trusted pool to another.³

These platforms also raise the bar for I/O efficiency. The new Intel® Xeon® processor E5 family supports Intel® Integrated I/O which reduces network and storage latency associated with virtualized workloads. It also supports the latest PCI Express* 3.0 specification to handle bandwidth-hungry applications.⁴

Intel® gives you more built-in power management optimization capabilities. Intel® Power Tuning technology and Intel® Intelligent Power Technology help optimize efficiency and reduce costs by allocating and dynamically balancing power at the rack, row, and data center level.

Today, many IT departments continue to experience staffing challenges brought on by the recent economic downturn. At the same time, IT managers are being asked to provide additional new and innovative services to the business. They look to Oracle to help them lower their costs and automate more processes so they can concentrate their resources and efforts on the mission-critical applications and value-added services that can differentiate their business.

Oracle can help IT to move forward and keep pace with increases in demand for more compute, network, and storage resources. We bring a unique perspective to the marketplace with our intense focus on enterprise applications and databases, specifically for large data centers. We help our customers identify ways to look at their entire infrastructure environments and understand both the costs and challenges, so that at the end of the day, the systems they deploy perform efficiently and deliver business value.

Oracle hardware and the Intel® Xeon® E5 family

We are very excited by the benefits delivered by the new Intel® Xeon™ processor E5-2600 product family, including the significant overall performance improvements, I/O enhancements, and built-in encryption technology with

Intel® Advanced Encryption Standard New Instructions (Intel® AES-NI).¹ The new processor performs 67 percent better than the prior generation² and has already helped us set a couple of world records for performance in our new systems. This level of performance and capability is extremely important for the demands of private cloud deployments. Our Solaris 11 operating system takes huge advantage of the encryption capabilities for protection of data both at rest and in transit.

telecommunications market. All these systems are shipping now.

Oracle and Intel: synergy that moves IT forward

We view our hardware as a supporting feature of application performance rather than an end to itself. So optimization at every single level is critical to deliver total throughput in the modern data center. Oracle and Intel have a long 20-year history of working together, both in terms of optimizing

When we design systems, we think about the total performance — not just for particular elements or components within the stack, but the entire stack.

In April 2012, we announced a number of new systems that employ the Intel® Xeon® processor E5 family. These products include Sun Fire* X4170 M3 and the Sun Fire X4270 M3, both of which are rack systems, and the Sun Blade* X6270 M3, which is an x86 server blade module for use in the Sun Blade 6000 chassis. We have also added a carrier-grade version of our rack system for the

some of Oracle's software products and deploying new Intel hardware designs. Because of our partnership, Oracle and Intel together have been able to optimize for Intel architectures—not just the hardware systems but also the middle layer and the database layer—providing total throughput that is unequaled in our view—and with world benchmarks on our x86 design to prove it.

¹Software and workloads used in performance tests may have been optimized for performance only on Intel microprocessors. Performance tests, such as SYSmark and MobileMark, are measured using specific computer systems, components, software, operations, and functions. Any change to any of those factors may cause the results to vary. You should consult other information and performance tests to assist you in fully evaluating your contemplated purchases, including the performance of that product when combined with other products. • ²Source: Testing with Oracle Database Enterprise Edition* 11.2.0.2 with Transparent Data Encryption (TDE) AES-256 shows as much as a 10x speedup when inserting one million rows 30 times into an empty table on the Intel® Xeon® processor X5680 (3.33GHz, 36MB RAM) using Intel® Integrated Performance Primitives (Intel® IPP) routines, compared to the Intel® Xeon® processor X5560 (2.93 GHz, 36 MB RAM) without Intel IPP. • ³No computer system can provide absolute security under all conditions. Intel® Trusted Execution Technology (Intel® TXT) requires a computer with Intel® Virtualization Technology, an Intel TXT-enabled processor, chipset, BIOS, Authenticated Code Modules, and an Intel TXT-compatible measured launched environment (MLE). Intel TXT also requires the system to contain a TPM v1.s. For more information, visit www.intel.com/content/www/us/en/data-security/security-overview-general-technology.html. • ⁴Intel measurements of average time for an I/O device read to local system memory under idle conditions. Improvement compares Intel® Xeon® processor E5-2600 product family (230 ns) vs. Intel Xeon processor 5500 series (340 ns). Baseline Configuration: An Intel system with two Intel® Xeon processor E5520 (2.26GHz, 4C), 12GB memory @ 1333, C-States disabled, Intel® Turbo Boost Technology disabled, SMT disabled, Rubicon* PCIe* 2.0 x8. New Configuration: Meridian system with two Intel® Xeon processor E5-2665 (CO stepping, 2.4GHz, 8C), 32GB memory @ 1600 MHz, C-States enabled, Intel® Turbo Boost Technology enabled. The measurements were taken with a LeCroy* PCIe* protocol analyzer using Intel internal Rubicon (PCIe* 2.0) and Florin (PCIe* 3.0) test cards running under Windows* 2008 R2 with SP1.

¹Intel AES-NI requires a computer system with an Intel AES-NI-enabled processor, as well as non-Intel software to execute the instructions in the correct sequence. Intel AES-NI is available on select Intel Core™ processors. For availability, consult your system manufacturer. For more information, see intel.com/content/www/us/en/architecture-and-technology/advanced-encryption-standard--aes-/data-protection-aes-generaltechnology.html. ²Intel Xeon processor E5-2658 benchmarking results collected by Intel Corporation, September 2011. Intel Xeon processor E5645 benchmarking results collected by Intel Corporation, June 2010. *Other names and brands may be claimed as the property of others.

Thanks to HP Intelligent Provisioning, Active Health System, and Smart Update, the DL360e Gen 8 family of servers is incredibly self-sufficient.

Sharpen up your data center with Blade servers

The ProLiant BL465c Gen8 server series has been built from the ground up for unprecedented performance, enhanced flexibility, and simplified management. Along with its upgrade to the blistering AMD Opteron™ processor family, this line of blade servers also gives you more DIMM

slots to hold up to 512GB of RAM — including 1.35V low-voltage memory. Plus, the iLO Management Engine helps automate your data center upkeep, improving your uptime while driving down maintenance costs. Call your Account Executive today to learn more about BL465c servers.

Modernize your server room with HP's DL360e appliances

Tomorrow's data center technology has arrived. The new Gen8 series of HP ProLiant DL360e servers has been completely redesigned to make your systems smarter, faster, and more self-sustaining than ever before. Whether your organization is running a physical or virtual data center, the new HP ProLiant DL360e G8 series of servers has the

robust processing power, massive memory capacity, and automated management features you need to work at peak performance. Plus, its HP iLO Management Engine balances power consumption with compute demands for maximum efficiency, and the new FlexibleLOM technology makes it simple to switch between network fabrics.

The BL465c G8 line uses FlexibleLOM network adapters, which allow you to switch between different connection standards without upgrading your hardware or installing a PCIe card.

HP ProLiant DL360e Gen 8 Server

Already running EVA and want to make the switch to 3PAR? HP makes it easy with their online import feature.

Equip your agency with bulletproof Tier 1 storage

HP 3PAR StoreServ 7000 Storage Bases

With rich capabilities and non-disruptive scalability to four nodes, HP 3PAR StoreServ 7000 Storage eliminates compromises between affordability and Tier 1 resiliency by giving you both. It shares the same architecture and software stack with all other HP 3PAR arrays, so you'll not only get the world's most advanced storage platform, but you'll also be able to meet block and file storage needs today and object storage needs as they emerge.

Grow with freedom in any direction

- One architecture and a single stack from midrange to high end
- Meet block, file, and object storage needs as they arise
- Ease data migration with storage federation software
- Affordable entry pricing and non-disruptive scalability to four nodes

Delivers enterprise features and resiliency at a price you can afford

- Automated DR configuration protects your data

- Mixed workload support increases your organization's consolidation opportunities
- Persistent technologies deliver high availability and Tier 1 resiliency
- Industry-leading thin technologies cut capacity requirements in half
- Automated subvolume tiering optimizes service levels and reduces costs

Simple to install, own, and upgrade

- New software suites simplify purchasing and lower costs
- SmartStart and Rapid Provisioning get you up and running in minutes
- Reconfigurable in just seconds without disruption
- Shares a single, simple management console with all HP 3PAR StoreServ
- Online Import makes upgrading from EVA effortless

Proliant ML350e's Active Health System provides continuous monitoring for greater stability and shorter downtimes.

Towering server strength packed in a compact tower

HP ProLiant ML350e Gen 8 Server

The HP ProLiant ML350e Gen8 is a dual processor tower platform built on the latest Intel® Xeon® E5-2400 processors to create a powerful system architecture. This unique architecture — as well as flexible deployment options — allow you to scale as needed and optimize your IT spending dollars. The HP ProLiant ML350e Gen8 delivers the industry's most powerful embedded management technology with HP integrated Lights-Out 4 (iLO4), giving you the freedom and flexibility to manage your servers anytime and from anywhere.

True 2P server optimized for price performance

- Unprecedented performance and technology with the latest Intel® Xeon® E5-2400 processor and integrated DDR3 memory architecture that supports both Registered and Unbuffered memory

Less upfront investment with room to grow

- Flexible design provides low-cost expansion capabilities as your organization grows, giving you the flexibility of adding a second processor, additional hard drive space, more memory, and more storage

Reduced overall complexity of server deployment and management

- HP iLO simplifies server setup and enables secure remote management
- HP Agentless Management provides for built in monitoring and alerting capability the moment the system turns on
- HP Intelligent Provisioning offers out-of-box single-server deployment and configuration without physical media

Key specs

- Quad-core Intel® Xeon® processor E5-2403 (10MB cache, 1.80GHz)
- 8GB RAM (expandable to 96GB)
- 24 hot-swappable hard drive bays
- HP Dynamic Smart Array B120i storage controller
- Dual-port NC361i Ethernet controller
- 460W power supply

DISASTER RECOVERY

- Data Center Consolidation
- Centralized Backups
- Data Protection
- Outage Identification
- Cloud-based Storage
- Automated Data Backup
- Virtual Recovery
- Disaster Recovery Support & Management
- Business Continuity Plan
- High Availability

PCMG IS HERE TO HELP YOU PLAN FOR THE UNPLANNED

Having systems unavailable and people unproductive for days or hours can be disastrous in terms of lost revenue and customer dissatisfaction. In today's 24x7x365 workplace, you can't afford to be without the technology and information needed to run your organization. And it's not just floods, fires, hurricanes, and tornados that can cripple your systems—it's the more common events like hardware failures, bad backups, viruses, and power outages that can impact an organization at any time.

The increasing number of physical disasters and security concerns has forced organizations to place a high priority on Business Continuity (BC) and Disaster Recovery (DR). According to a Q3 2012 Forrester Research survey, 61% of IT

Executives report[ed] that purchasing or upgrading BC and DR capabilities was a top priority.¹

There is no tolerance for downtime in today's environment. Think about the impact on productivity and customer communications when something as simple as email goes down. Now, consider when critical business applications are disrupted and the financial impact it could have if you're unable to process sales orders or service customers.

Recovery strategies should be developed for systems, applications and data – including networks, servers, desktops, laptops, and mobile devices. IT systems require hardware, software and connectivity. Without one component, the system may not run.

Recovery strategies should be developed to anticipate the loss of one or more of the following:

- Computer room environment (secure computer room with climate control, conditioned and backup power supply, etc.)
- Hardware (networks, servers, desktop and laptop computers, wireless devices and peripherals)
- Connectivity to a service provider (fiber, cable, wireless, etc.)
- Software applications (Email, EDI, office productivity, etc.)
- Data and restoration

Some business applications cannot tolerate any downtime. They utilize dual data centers capable of handling all data processing needs, which run in parallel with data mirrored or

synchronized between the two centers. This is a very expensive solution that only larger organizations can afford. However, there are other solutions available for small to medium sized organizations with critical business applications and data to protect.

Business demands for higher levels of IT availability will continue to

increase. It's not a question of "if" but "how" IT operations will achieve these demands cost effectively. PCMG offers products and solutions that can help you to get back up and running when a disaster strikes. From backup software to power & cooling and more, we've got you covered.

61% of IT Executives report that purchasing or upgrading Business Continuity and Disaster Recovery capabilities is a top priority.

Protect your data center – and your bottom line – with affordable disaster recovery products.

High-performance networking equipment

Dell SonicWALL TZ 215 TotalSecure

The Dell™ SonicWALL™ TZ 215 is the highest performing, most secure Unified Threat Management (UTM) firewall available today. Along with protecting against a range of threats, it delivers the broadest mobile platform support for laptops, smartphones, and tablets.

High-performance security engine

The TZ 215 uses patented Reassembly-Free Deep Packet Inspection® to examine traffic simultaneously across all ports without introducing latency.

Integrated intrusion prevention

A tightly integrated intrusion prevention engine protects against an array of application-layer exploits that target both servers and client machines on the network.

Dell SonicWALL Mobile Connect™

SonicWALL™ Mobile Connect, a single unified client app for Apple® iOS and Google® Android™, provides smartphone and tablet users superior network-level access to corporate and academic resources over encrypted SSL VPN connections.

Dual-band wireless

Ideal for retail and office environments, dual-band wireless provides integrated 802.11a/b/g/n secure access over both the 2.4GHz and the 5GHz spectrums.

only **\$931** #9053121

Armed with 2.5" drives, the PowerVault takes up less space and consumes less power.

Expand your organization's storage capacity with Dell

Dell PowerVault MD1200 Direct

Dell™ PowerVault™ MD1200 direct-attached storage array is the second generation of Dell's low-cost, high-capacity expansion enclosure that improves density, versatility, and performance over previous generation to enhance support for mainstream and capacity-intensive applications.

The PowerVault™ MD1200 offers seamless expansion for Dell™ PowerEdge servers with the PERC H800 Host-RAID adapter and provides you with the most drive flexibility of any Dell direct-attach storage arrays.

- Supports mainstream and capacity-intensive applications such as email, backup to disk, and video streaming
- Seamless server expansion for 6Gb/s SAS environments
- Deployment and drive versatility good for investment protection and data tiering
- Keep your data safe with redundant path I/O load balancing and self-encrypting drives (SED)

only **\$8319⁹⁹** #8239144

Access critical data remotely and securely

Dell SonicWALL SRA 4600 VPN Gateway

Keeping up with the daily grind often requires giving employees secure access to information so they can work on files from anywhere – and that's exactly what the Dell™ SonicWALL™ SRA 4600 VPN Gateway delivers. Designed for organizations with up to 500 remote employees, the SRA 4600 offers granular policy configuration controls, seamless integration, mobile device support, and more. Remote employees can easily access email, files, and applications using the web-based Virtual Office or NetExtender, a lightweight client providing network level connectivity.

The SRA 4600 works with virtually any firewall, though deploying it alongside a Dell™ SonicWALL™ firewall

delivers enhanced security benefits. The multi-layered protection of Dell™ SonicWALL™ Clean VPN secures both VPN access and traffic. All authorized SSL VPN traffic is decrypted and decontaminated before it enters the network environment. While cleaning inbound traffic for malware, outbound traffic is verified in real time.

- Enables access from Windows®, Mac OS®, iOS, Google® Android™, and Linux® devices
- SSL encryption, tokenless two-factor authentication and rich access-privilege management
- Optional remote support, secure virtual meeting, Web Application Firewall, and End Point Control

only **\$1449⁹⁹** #9425173

Easy-to-use, comprehensive, and affordable deployment solutions

Dell KACE K2000 Deployment Appliances

Dell™ KACE™ K2000 Deployment Appliances represent a fully integrated systems provisioning solution that can help eliminate the complexities of software-based deployment processes through a simple interface and comprehensive functionality.

No matter the size of your organization, the Dell™ KACE™ K2000 can fulfill your systems deployment needs while significantly reducing the strain on your IT resources. In a fraction of the time it takes to deploy systems using software-based solutions, you can perform inventory

assessments, OS imaging, application provisioning, and data migration and recovery tasks.

- Enjoy centralized control with an intuitive web-based console that allows for one-click updates and requires minimal training to use
- Simplify pre- and post-deployment configuration tasks through automated processes
- Keep costs low with plug-and-play deployment and self-healing capabilities

Meet your storage needs with affordable EMC's VNXe Unified Storage

EMC VNXe Series Unified Storage

EMC's latest VNXe series redefines networked storage for smaller organizations that demand enterprise-grade features. VNXe delivers true storage consolidation, seamless management, and an application-driven interface.

Scalable up to 240TB, these unified storage devices are engineered for easy expansion. They boast built-in data management tools, including thin provisioning, file deduplication, and local or remote

replication. Plus, they can be ready for provisioning in 30 minutes.

- Support for file (CIFS and NFS) and block (iSCSI) storage snapshots and replication (local and remote)
- Application-focused storage provisioning designed with best practices built right in
- VMware and Hyper-V server integration
- A new Unisphere interface for simplified, intuitive storage management that doesn't skimp on features

Supercharge your office's switching with Cisco

Cisco MDS 9100 Series Multilayer Fabric Switch

As your organization strives to meet strategic and application needs, you are often challenged by economic realities. Your institution needs innovative SAN solutions that are flexible, agile, highly available, highly secure, easy to use, and affordable.

Cisco MDS 9100 Series Multilayer Fabric Switches meet these requirements, providing an affordable and capable solution for organizations. Among other benefits, they offer:

- Highly reliable and available performance
- Reduced total cost of operation (TCO)
- Optimized virtual server environments with simplified configuration and management

Whether you're running a physical or a virtual data center, the Cisco MDS 9100 works in any environment.

When combined with active shutter glasses, this projector uses DLP Link technology to create impressive 3D images.

Transmit video signals up to 500'

TruLink VGA+3.5mm+ RS-232 over UTP Transmitter and Wall Plate Receiver Kit

The TruLink Transmitter and Wall Plate Receiver Kit allows you to extend a VGA, 3.5mm audio, and RS-232 signal over two Cat 5, Cat 5e, or Cat 6 cables up to 500', providing pixel-perfect 1920×1200 or 1920×1080 display resolutions.

Ideal for classrooms, government offices, and corporate environments, this solution is compatible with any operating system and requires no drivers or software. Plus, it utilizes phantom power, giving you the flexibility to supply energy at either the transmitter or receiver end.

For maximum clarity, you're able to fine-tune the EQ (sharpness), and the EDID copy feature ensures compatibility with any monitor. It's also equipped with built-in power surge protection and high ground loop immunity, delivering high performance signal extension.

With the TruLink VGA Transmitter Kit, you can run displays in public while keeping CPUs private and secure.

PCMG Terms of Use & Sale

- All returns require a return authorization number. Requests must be made within 15 days of purchase. Returns may be subject to a minimum 15% restock fee. The amount refunded will be the lower price of either the date of purchase or date of return.
- To request a return authorization number, please call your Account Executive at the phone number listed on the front of this packing slip.
- Tape the return label provided to you on the box and ensure the return authorization number is clearly marked. Do not write on the original manufacturer's box.
- Returned product(s) must be complete including manufacturer's original package, accessories, software and manuals. Incomplete returns may be refused.
- A product must be received in our warehouse within 10 business days from the date the return authorization is given.
- The customer is responsible for all return shipping costs. COD shipments will not be accepted.
- We are not responsible for lost or stolen packages. We recommend using a courier that can track your package with a tracking number.
- Pack your return securely. We recommend insuring it for your protection.
- All other policies are in accordance with the policies published in our latest catalogs and on our website www.pcmg.com.
- We are not responsible for integrity or backups of data on any drive returned to us even if included in a system.
- Subsequent to an approval authorization, a credit to an account or issuance of a check can take up to 30 days.
- Missing a rebate? Look it up on our website: www.pcmg.com or call your Account Executive.

Terms/Warranty Disclaimer. PCMG expressly disclaims all expressed or implied warranties. Including any implied warranty of merchantability or of fitness for a particular purpose non-infringement. PCMG shall have no liability to anyone for incidental or consequential damages or any other liability, loss or damage arising out of or related to the merchandise sold. All merchandise is so "AS IS". PCMG makes no warranty as to the performance of any merchandise sold. We are not responsible for the system downtime, lost date, etc. This disclaimer by PCMG in no way affects the terms of a manufacturer warranty, if any. The following manufacturer's products cannot be returned for any reason. The manufacturer must be contacted for all repairs and warranty replacements. The warranty on the product is directly from the manufacturer. We will be happy to assist with the installation and instructions. However, the following manufacturers require you to contact them directly for repairs or replacement of your product. Unless subject to applicable master agreement or SOW signed by each parties, the offer and sale related to this invoice/packing slip is subject to the Terms of Use and Sale @ <http://www.pcmg.com> and those set forth herein notwithstanding any purchase order to the contrary. Any disputes related hereto must be brought individually and not part of any class, in accordance with the above relevant Terms of Use and Sale.

The following manufacturer's product cannot be returned for any reason. The manufacturer must be contacted for all repairs and warranty replacements.

TAKE CONTROL OF YOUR SOFTWARE

Curb costs and streamline software management with PCMG Licensing programs

Navigating the convoluted world of software licensing is both incredibly complex and time consuming. It involves issues like where, how, and how often you can install the programs — as well as whether they can be copied or modified or even redistributed. Then, after you have purchased the software, there is a license term that will expire after a specified period of time and must be renewed. Add when you add in multiple license programs, users, and

workstations, it all becomes difficult to manage effectively.

Most vendors offer some type of bulk purchasing and volume licensing options for their software. A volume license gives you the legal right to install a single software application at multiple workstations without purchasing additional copies for each machine. The terms vary, but if you order enough software to qualify, it may cost less in the long run and often makes administration costs easier. Also, volume

licensing often provides a central place to manage all your licenses for a particular product or group of products.

PCMG is also here to help simplify your software management. Whether you are upgrading to the latest version or investigating new software options, our experienced software licensing support teams have the technical expertise to help with recommendations, deployments, and migrations. We work closely with over 800 software vendors and manage over 200 different

licensing programs. We endorse the best solutions, not specific vendors.

Licensing Specialists

Our Licensing Specialists have been trained on the major volume licensing programs and work with our vendors to keep program information up to date. With over a decade of experience in volume licensing, PCMG has the right resources to help your organization develop the right software strategy to fit your current situation while planning for future growth. For example, as a Microsoft Gold Partner, we have a team specifically focused on Microsoft contractual licensing. This team will work hand-in-hand with you and your Account Executive to come up with the best solution and

help you take full advantage of all the benefits of Microsoft's Software Assurance Program.

We also maintain a staff of pre-sales engineers in the networking, storage, security, and mobility categories. When appropriate, these engineers will consult with you for technical questions and assessments. They will look for compatibility issues and other potential concerns that may impact the success of your software purchase.

Confidence After the Sale

PCMG is always here to assist you — both before and after the sale — and can help if you have questions or experience problems with your purchase. Our highly trained technicians offer superior telephone-based support and can help with

software setup and operations; diagnostics of key components; and troubleshooting software failures.

We also understand that staying on top of software licensing compliance can be both aggravating and inefficient. That's why we offer you an online tracking tool to simplify your license management. Our Software License Asset Manager (SLAM) tool can help you:

- Manage license agreements and track expiration dates
- Generate license inventory report for delivery via email
- Send reminders when license agreements will expire

With a broad range of industry relationships, PCMG offers you a single, reliable source to the best solutions from the world's top software vendors.

PCMG has the software your agency needs at a price that fits your budget.
